

Synergistic SE

# Cappuccino

Genetic Type	Synergistic SE
Maturity	73 days
Color	Bicolor
Disease Resistances	IR Ht, IR Rust, IR Stewarts

Cappuccino is a 73 Day synergistic bicolor that performs when you most need it to. Ears are large for a second early measuring 8" x 1.8", with 16 rows average. Cappuccino was bred to perform in all time slots, early, mid and late season plantings making it a perfect choice for when you are in need of a rain gap corn. It has very good cold soil emergence and vigor, plus Cappuccino offers the high eating quality your consumers demand. With intermediate resistance to Stewarts wilt, Rust, and Northern corn leaf blight, Cappuccino is the perfect choice for growers who require a product that maintains its performance all season long.
